Education

Bachelor of Science in Computer Science | Memorial University | 2024 – Present | **Dean's List 24-25 & 25-26** | GPA 4.0

High School Diploma (Grades IX–XII) | Our Own High School, Al Warqa | 2020–2024 | Grade XII marks 91%

Work Experience

Visual Analytics & Computing Lab, Memorial University (Sep 2025 - Present)

St John's, NL, Canada

Research Assistant

- Built static and animated light-field holograms for the [Looking Glass 3000](#) using **Maya**, **OctaneRender**, and multi-view image processing using the lab's custom light-field workflow.
- Troubleshoot camera scaling, scene export, rendering, and **image-combining issues** across the light-field workflow.
- Improved visual quality and calibrated the simulator and physical display for consistent framing, depth, and output.

Hatcher Commons, Memorial University (Sep 2025 - Dec 2025)

St John's, NL, Canada

Math & Computer Science Tutor

- Provided academic support for introductory CS and math courses, including calculus, discrete math, **Python**, and computer architecture, helping students understand concepts and work through problems.

Mont Hawk Trading L.L.C (Feb 2022 - Aug 2024)

Dubai, UAE

Logistics & E-commerce support

- Supported inventory, order processing, and e-commerce operations using Oracle APEX, Excel, Shopify, and Amazon.

Projects

- [RanRoute](#)— AI Route Planner for Small Businesses:** Built a full-stack delivery route optimization platform for solo and small-fleet operators as part of the **IBM AI Builders Challenge**, featuring plain-English route instructions processed by two IBM Granite AI agents on watsonx.ai, an **OR-Tools combinatorial** solver optimizing drive time up to 25 stops, and a three-path customer import system supporting manual entry, spreadsheet upload, and unstructured text extraction.

Tech Stack: React • Vite • Python • FastAPI • Supabase • PostgreSQL • IBM Granite • Watsonx.ai • OR-Tools • Google Maps API • Nominatim • OpenStreetMap

- [Blokus](#)- Multiplayer Strategy Game:** Developed a fully functional multiplayer Blokus game as a university **team project** in Java, featuring a 20×20 interactive board, an AI opponent with Easy and Hard difficulty modes using a heuristic scoring algorithm, colour accessibility support for colour vision deficiencies, and a complete save/load system.

Tech Stack: Java • Swing • JUnit • Java Serialization • Java AWT.

Skills

Languages & Databases: Python, Java, C, JavaScript, Go, Verilog, Assembly, HTML, CSS, MySQL, PostgreSQL.

Frameworks, Tools & Platforms: React, TensorFlow, AutoGen, Docker, Kubernetes, Linux, Azure, AWS, Maya, Octane.

Languages: English, Hindi, French (Intermediate, B1)

Clubs & Community Involvement

Quant Society | **Data and Infra team** | Apr 2025-Present | Deployed trading strategies by backtesting portfolio team models, integrating them into the society's live trading bot. Worked as part of a team to develop a **sentiment machine learning bot** that generates trading models from sentiment data, while contributing to the **CI/CD** pipeline for the live trading system.

International Student Resource Center (ISC) | VP Internal

Student Volunteer Bureau | Volunteer | **Bronze Certification Completed** | Let's Talk Science, Make Midterm Matter etc.

Awards & Certifications

International Undergraduate Academic Award (IUAA) | Memorial University | **3,400 CAD** | 2025

Faculty of Science Opportunity Fund Scholarship | Memorial University | **2,650 CAD** | 2026

Cloud Computing Fundamentals | IBM Skillsbuild

Cybersecurity Fundamentals Guided Learning with Capstone | IBM Skillsbuild

AI Agentic Design Patterns with AutoGen | DeepLearning.AI
